

Gas Discharge Tube Dlodes

3R075~3R600(T/S/L/C)A_B-6 Series

GDTs (Gas Discharge Tubes) are placed in front of, and in parallel with, sensitive telecom equipment such as power lines, communication lines, signal lines and data transmission lines to help protect them from damage caused by transient surge voltages that may result from lightning strikes and equipment switching operations. These devices do not influence the signal in normal operation. However, in the event of an overvoltage surge, such as a lightning strike, the GDT switches to a low impedance state and diverts the energy away from the sensitive equipment.

GDTs offer a high level of surge protection, a broad voltage range, low capacitance, and many form factors including new surface mount devices, which makes them suitable for applications such as MDF (Main Distribution Frame) modules, high data-rate telecom applications (e.g. ADSL, VDSL), and surge protection on power lines. Their low capacitance also results in less signal distortion. When used in a coordinated circuit protection solution with PTC devices, TSS thyristor surge protection devices, and MOV (Metal Oxide Varistor) devices, they can help equipment manufacturers meet

Features

- RoHS compliant and Lead-free
- GHz working frequency
- Excellent stability on multiple pulse duty cycle
- Excellent response to fast rising transients.
- Ultra Low Insertion Loss
- Compact, small form factor suitable for efficient
 assembly
- Helps provide overvoltage fault protection against high energy surges
- · Suitable for high-frequency applications

Applications

- Communication equipment
- CATV equipment
- Test equipment
- Data lines
- Power supplies
- Telecom SLIC protection

- Broad voltage range from 75V-600V
- Various form factors: surface mount, axial leads, no leads
- · Low capacitance and insertion loss
- · RoHS compliant
- Devices tested per ITU K.12 recommendations
- · Non-radioactive materials
- Broadband equipment
- ADSL equipment including ADSL2+
- XDSL equipment
- · Satellite and CATV equipment
- General telecom equipment
